

# Scheherazade New - Character Set Support

The Scheherazade New font contains complete coverage of all the characters defined in Unicode for Arabic script (excluding the Arabic Presentation Forms blocks, which are not recommended for normal use).

[Arabic \(U+0600..U+06FF\)](#) was added to Unicode 1.0. [Arabic Supplement \(U+0750..U+077F\)](#) was added to Unicode 4.1 and [Arabic Extended-A \(U+08A0..U+08FF\)](#) was added to Unicode 6.1. There are still some Arabic script characters being added to Unicode, so it is possible that not all languages using the Arabic script are fully represented in Unicode.

## Supported characters

The following character ranges are supported by this font:

Unicode block	Scheherazade New support
Arabic	✓
Arabic Supplement	✓
Arabic Extended-A	✓
Arabic Presentation Forms-A	only includes FD3E..FD3F, FD40..FD4F, FDCF, FDF2, FDFA..FDFF
Arabic Presentation Forms-B	✗
Codepage 1252 (Western) <sup>1</sup>	✓

A selection of characters from the General Punctuation block, such as various-sized spaces, are also supported; a utility such as [SIL ViewGlyph](#) can be used to examine the exact repertoire of this font.

<sup>1</sup>Inclusion of basic Latin repertoire is provided as a convenience, e.g., for use in menus or for displaying markup in text files; these fonts are not intended for extensive Latin script use.

This guide is from the [Scheherazade New project](#) version 3.200 and is copyright © 1994-2021 SIL International.
